

West Virginia Geological and Economic Survey

Colloquium Series

Presenting

Greg Good, Ph.D.
WVU Department of History

Date: **Monday March 3rd 2008**

Time: **Noon**

Place: **Large Conference Room**

Refreshments: **B.Y.O._.**

Heresy in Cambridge, Take 2: Paleomagnetism and Continental Drift in Cambridge before Vine and Matthews

Greg is a History of Science professor at WVU, and this talk is one of the stories in his forthcoming book, *Magnetic Lives*. He has been everywhere from Fairbanks to Berlin digging in archives to unearth, so to speak, information on the very diverse scientists who built careers around the Earth's magnetism.

This talk won't be extremely technical and therefore is rated **G** for general audiences (ignore the scary-sounding title).
