and Manager, Oil and Gas Program  
West Virginia Geological and Economic Survey**

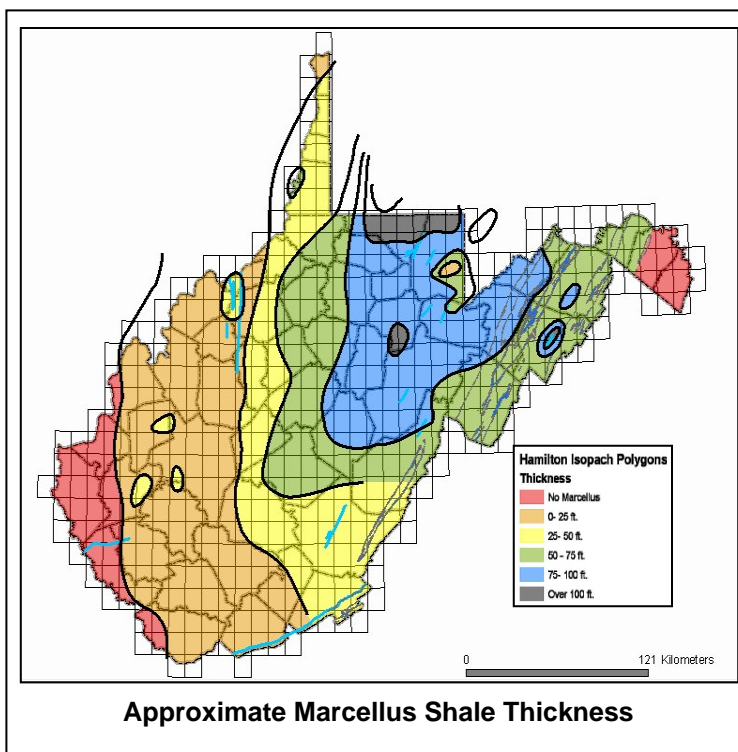

**Date and Time: Monday April 27, 2009 at Noon**

**Place: Large Conference Room behind Publication Sales**

---

## Geology of the Marcellus Shale

---

Unless you've been living in a cave for the last couple of years, you have probably heard about natural gas exploration in the Marcellus Shale. The demand for the Survey's own Lee Avary to talk about this new old gas play is high, but we were able to book her for a limited engagement here on Monday April 27<sup>th</sup> at noon. Lee will tell us about the geology of the Marcellus Shale and what makes this gas play viable now, even though we've known about it for a long time.

Lee will make time to answer your questions.
