

National Cooperative Geologic Mapping Program 2017

**SUMMARY OF STATEMAP
GEOLOGIC MAPPING PROGRAM IN WEST VIRGINIA**

Federal Fiscal Year	Project Quadrangle	State Funding	Federal Funding	Total Funding
1993	Canaan Valley	\$26,545	\$23,167	\$49,712
1994	Canaan Valley - Davis	40,987	23,000	63,987
1994	Big Pool/Glengary	40,836	30,000	70,836
1995	Canaan Valley - Mt. Storm	39,251	22,000	61,251
1996	Hagerstown/Frederick	12,435	10,210	22,645
1996	Great Cacapon/Paw Paw	70,394	50,000	120,394
1997	Blackbird Knob	33,529	24,675	58,204
1997	Largent/Levels	69,166	63,568	132,734
1997	Palo Alto	37,910	30,400	68,310
1997	Cumberland/Winchester	16,876	16,201	33,077
1998	Doe Hill/Sugar Grove	50,764	43,241	94,005
1998	Winchester/Front Royal	28,809	24,568	53,377
1999	Bluefield/Princeton	39,391	28,676	68,067
1999	Moatstown	32,618	26,996	59,614
1999	Capon Bridge/Rio	33,089	30,449	63,538
2000	Oakvale/Athens	25,603	25,603	51,206
2000	Sector/Moorefield	28,775	28,775	57,550
2000	Brandywine	15,622	15,622	31,244
2001	Petersburg East and e. Rig	35,697	32,732	68,429
2001	Snowy Mountain, Spruce Knob	36,749	35,619	72,368
2001	Lerona and Matoaka	37,314	31,132	68,446
2002	w. Old Fields, w. Rig, Lake Lynn	36,309	34,692	71,001
2002	Circleville and Thornwood	33,006	27,559	60,565
2003	Morgantown North and South	39,000	25,645	64,646
2003	Franklin, e. Old Fields, w. Romney	34,918	26,818	61,736
2004	Ft Seybert, e. Romney, e. Spring.	42,095	32,569	74,664
2004	Osage and Rivesville	27,361	18,159	45,520
2005	Mozer, w. Springfield, s. Patt. Crk.	44,688	37,321	82,009
2005	Grant Town	13,893	13,398	27,291
2006	Milam, Cow Knob, Headsville	45,539	26,780	72,319
2006	Wheeling, Tiltonsville, Bethany (WV)	32,999	15,953	48,952
2007	Burlington	13,579	12,357	25,936
2007	Val. Grove, Mannington, Bethany (PA)	36,770	12,651	49,421
2008	Medley, Sharp Knob, Hightown	86,458	66,134	152,592
2009	Antioch, Paddy Knob, Mustoe	47,516	47,134	94,650
2010	Greenland Gap	29,682	29,022	58,704
2011	Clover Lick	34,600	24,236	58,836
2012	Minnehaha Springs, Sunrise (WV only), Glady	55,101	31,137	86,238
2013	Oak Hill, Marlinton, Whitmer	80,616	68,196	148,812
2014	Masontown, Harman, Lake Sherwood and Mountain Grove (WV only)	85,373	69,278	154,651
2015	Alvon, Bowden, Valley Point, Cuzzart, and Sang Run (WV only)	147,089	98,209	245,298
2016	Parsons & S. part Saint George, Kingwood, Terra Alta and Oakland (WV only)	80,363	75,466	155,829
2017	Montrose, Lead Mine, Mozark Mountain, White Sulphur Springs	160,344	150,915	311,259
	Totals	\$1,959,659	\$1,560,263	\$3,519,983

The United States Geological Survey (USGS), through the National Cooperative Geologic Mapping Program's STATEMAP program, provides matching funds to the West Virginia Geological and Economic Survey (WVGES) to map the geology of West Virginia. Geologic maps are used by individuals, government, schools, and industry to locate and evaluate waste-disposal sites, identify domestic and public water sources, educate teachers and students about the geology of the state, and identify historic landslides.

Map areas are prioritized according to the Statewide Geologic Mapping Plan. A panel of representatives from Industry, Education, and Government sets the priorities and ranks the proposed projects every year. These priorities include infrastructure and economic development, high population growth, rural development, mining, quarrying, oil and gas, karst, tourism and natural beauty, recreational use, environmental concerns, current interest, and significant water resources.

Recent Outcomes: The Geoscience Program Coordinator at Fairmont State University (FSU), used geologic maps and reports produced by the STATEMAP program to train WV teachers and provide them with continuing education opportunities. This is especially critical now because WV recently – beginning in the 2016-2017 academic year – required high school students to take Earth and Space Science, a course from the Next Generation Science Standards (NGSS), before they can graduate.

This past summer, FSU coordinated a professional development workshop that included a geology field trip in the geologically complex Browns Mountain Anticlinorium, an area mapped with the help of STATEMAP funds. 45 workshop participants used the Minnehaha Springs and Marlinton quadrangles, mapped with STATEMAP funds in 2012 and 2013, during that field trip. The use of these maps will ultimately impact well over 4,242 WV students.

June 2017
